

Diskeeper® 2011

Optimum system performance. Always.™

Diskeeper® 2011 Performance Technology vs. the Built-In Defragmenter in Windows Operating Systems.

Diskeeper 2011 enables Windows® operating systems to run at their peak potential, without the crippling effects of fragmentation. Fragmentation occurs when files are written in pieces and scattered around the disk, slowing both writing and reading.

This chart lists some of the major differences between Diskeeper and the built-in defragmenter in Windows 7/Vista.

Critical Features*	Built-in defragmenter	Diskeeper 2011 editions
Includes IntelliWrite® fragmentation prevention technology. Prevents 85% of fragmentation before it happens saving resources and energy!	—	✓
Includes InvisiTasking® technology. Zero impact on system resources.	—	✓
Instant Defrag™ engine. Instant Defrag is a new intelligence that understands how your files are used and ensures they never have to be read in fragments.	—	✓
Efficient Mode. Offers the greatest net gain in system I/O resource savings ever available.	—	✓
Free space consolidation engine. Swiftly consolidates free space and tightly integrates with Instant Defrag to handle new fragmentation as soon as it is created.	—	✓
Fast and robust even on disks with less than 1% free space.	—	✓
Centralized administrative control (deployment, configuration, alerts, reports).	—	✓
SCOM integration.	—	✓
Fast defrag (of any remaining fragmentation) on volumes up to 20TB and more (Terabyte Volume Engine® technology and Titan Defrag Engine™ technology).	—	✓
Group policy management.	—	✓
When defrag is needed, automatically selects best defrag algorithm for your system's needs.	—	✓
Frequently updated cutting-edge technology.	—	✓
Lowers cost of ownership.	—	✓
Significantly reduces energy consumption and cooling requirements.	—	✓
Reduces drive wear and extends system life.	—	✓
